BRAND OVERVIEW

Introduction

A brand is not just a logo.
It is how we engage, inform and convince.

We achieve this by having a unique visual identity and
tone of voice that encapsulates our ‘truth’
- and by using it consistently.

These guidelines are designed to help Doherty Associates and
our creative partners to confidently communicate this identity,
so we can build recognition of who we are, what we stand
for and what people can expect from us.

About Doherty Associates

Doherty Associates is an IT consultancy employing over 100 people worldwide, with offices in London and Kuala Lumpur. This presence in two different time zones means clients receive first class support 24 hours a day, 365 days a year.

The company was established in 1991 by Founder and Chief Executive, Terry Doherty, whose vision was to leverage the power of technology to help companies grow.

Today, Doherty Associates is a Tier 1 Microsoft Gold Partner, recognised for giving first-class support across the full suite of Microsoft products. Typically, this support is in one or both of two key areas: cloud and cyber security (i.e. safety) and business development (i.e. growth and opportunity). Both

require an astute understanding of technology coupled with deep business insight; areas where the company excels.

The majority of Doherty Associates' clients operate in the financial and legal sectors, where security, compliance and trust are paramount. But they also come from less traditional areas such as mining, where the challenges can be complex and tricky to solve.

Whether they arrive with a problem to fix or opportunities to pursue, many new clients go on to become long-term partners, appreciating 'the Doherty difference' – the chance to work with experts who talk like humans and genuinely want to help.

Our positioning statement

‘Combined Expertise’

At Doherty Associates, it’s not one quality that sets us apart, but our many strengths.

By drawing on the expertise, insight and experience of our team, we are able to offer each client a ‘more than the sum of its parts’ solution that enables them to work more productively and to gather momentum.

Hence it’s all about Combined Expertise
– both as a team and with our clients.

Our vision

...to awaken aspiration
for better technology

Our mission

...to understand our
clients' priorities and provide
intelligent tailored IT solutions
that solve problems, unlock
opportunities, and help them
to grow their business

Our shared DNA and values

While the team's strengths are diverse, Doherty Associates is characterised by three core strands of DNA, and the values that combine to support them.

We are

'Relentlessly reliable'

- Committed to keeping our promises
- Passionate about helping our clients identify and fulfil their potential
- Determined to prove the role of technology in delivering competitive advantage

'Intelligent challengers'

- Creative in our thinking and doing
- Confident in seeing change as an opportunity
- Bold in our willingness to challenge the norm

'People before process'

- Open in our conversations and dealings
- Responsive to the needs of others
- Engaging in the way we communicate - and demystify

®

TONE OF VOICE

Our tone of voice

Doherty Associates is made up of intelligent humans with shared experiences but different perspectives. Staff members especially should feel confident to ‘be themselves’ when communicating with clients and prospects, because that confidence is rooted in ability.

However, we do need to be consistent in our approach and everyone should take this tonal steer on board.

Speaking as approachable, responsive humans

One of our many strengths is that we listen, understand and work with our clients to achieve their goals. We don’t baffle them with IT-speak. Instead, we convey how technology can solve their problems and create opportunities to grow their business. And because we genuinely care about the outcomes, we always go that little bit further in pursuit of a job well done.

Speaking with considered confidence

Another of our many strengths is the breadth of experience and depth of know-how we have in our team. We’re confident in our abilities so we don’t need to rush in all guns blazing; we can reflect and provide a considered perspective, drawing from a pool of many talents. If we are bold or suggest something radical, it is always to a purpose.

Speaking with energy and interest

Another of our many strengths is our genuine passion for what we do; not just the technology itself and its evolving capabilities, but the difference we can make to our clients’ lives and businesses. So whether it’s unpicking knotty problems or opening eyes to the ‘what if?’ power of technology, we’re always fully engaged.

Our tonal values might therefore be expressed as:

Approachable, considered, purposeful, energised

Our tone of voice in action

Here are some pointers on what we can do
– and avoid doing – to hit the right tone.

Speaking as approachable, responsive humans means...

- Using conversational language
- Being as jargon-free as possible
- Focussing on the benefits the technology will deliver, not just the technology itself
- Being clear about who key individuals are and how to reach them

Speaking with considered confidence means...

- Not feeling the need to ‘chuck every ball’ and instead making well-considered choices
- Making bold suggestions, where appropriate
- Including relevant ‘evidence’, such as previous experience and industry context
- Having the courage to leave things out

Speaking with energy and interest means...

- Taking a minute before starting to ask yourself: ‘what makes this interesting?’ and then ordering content to support that point
- Using the active voice – ‘doing’ not being done to
- Making outward connections e.g. to exciting advances in IT or the wider world

Conveying Combined Expertise

How to amplify and
foreground our
Combined Expertise
message

Combined Expertise is a truth for Doherty Associates, so we don't need to keep stating it. However, there may be times when it is beneficial to amplify or foreground this message.

In those instances, we might talk about:

- The depth and breadth of our knowledge
- The multifaceted nature of our team
- Our many years of experience
- How we work with partners to combine their expertise with our own
- How we look at every angle
- How we consider multiple perspectives

Combined Expertise

The graphic interpretation

The initial letter 'D', of the name Doherty, is formed of multiple strands to illustrate that Doherty Associates has multiple strengths.

In turn, multiple 'D's are then combined to create a unique, dynamic mnemonic.

LOGO

Logo

Vertical composition

DOHERTY
ASSOCIATES

Combined Expertise

Logo

Horizontal composition

DOHERTY
ASSOCIATES

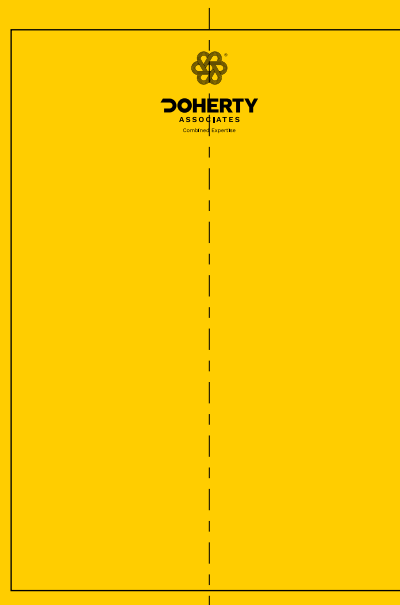

Combined Expertise

Logo composition and positioning

Some discretion can be shown by the designer in terms of logo composition and position but the format, the audience and how it will be used should be considered.

See further guidance below:

Vertical composition

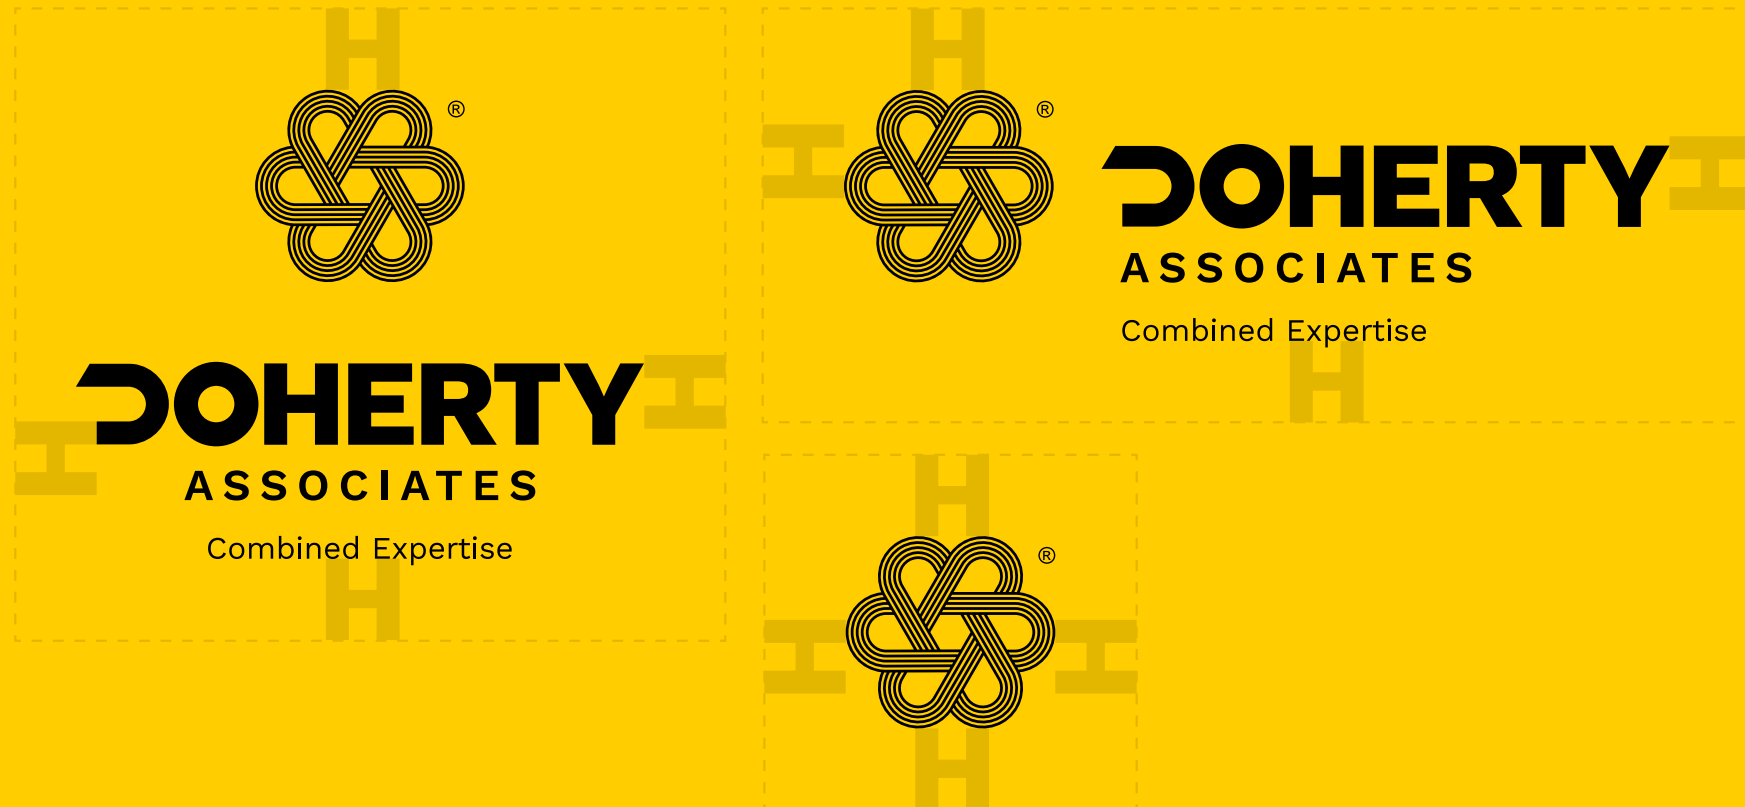

The vertical logo lends itself well to being centred, in portrait documents where you can afford to be more indulgent with space, such as stationery and brochures.

Horizontal composition

The horizontal logo lends itself well to a left alignment on narrow, landscape documents where space is tight, such as websites, banners, adverts and signage.

Logo safe-zone

The Doherty Associates logo is a perfectly balanced combination of the unique icon and typography.

The clearance should always be at least the cap height of the 'H' taken from logotype as indicated here.

Please ensure no other typographic or graphic element encroaches on this designated logo safe-zone.

Always place the logo where the background colour or imagery is visually 'calm'.

Logo don'ts

These rules also apply to the horizontal version of the logo.

Don't use logotype without the icon.

Don't use alternative fonts.

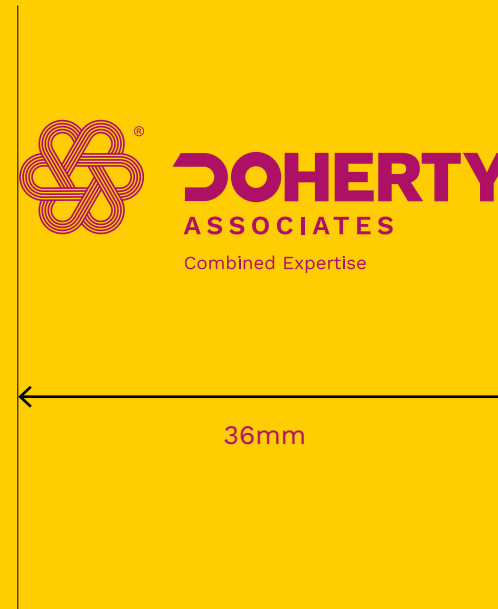

Don't resize the component parts.

Don't use non-primary colours (see p27-29).

Logo minimum print size

To ensure the logo is as clear as possible when printed please use the guide below.

These sizes are based on using professional digital/litho printers. For use with in-house desktop printers please use discretion to ensure quality and legibility particularly of the icon.

Remove the strapline and registered ® symbol when printing below
35mm wide (vertical logo) or 50mm wide (horizontal logo)

Partner logos

There is often a requirement to combine the Doherty Associates logo with those of partners and affiliates.
These combinations should be contained in boxes as shown below.
The Doherty Associates logo should always come first.

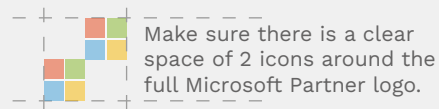

Microsoft Partner Logo

Minimum size:

Clear space:

Strictly no changes to be made to the logo provided.
Please refer to the full Microsoft Partner Logo guidelines for full usage.
A smaller version of the logo can be obtained for use on smaller items.

Co-branding

In instances where we need to apply our brand alongside our partners or collaborators, make sure the exclusion area is included. Use a stroke to the height of the logo in between and ensure the size of both logos is relative to each other.

ICON

Icon

Icon usage

The icon may be substituted for the full combination logo, but only when it is clearly part of a Doherty Associates' communication.

It may be reproduced at any size and placed anywhere on the page, in full or part and in any of our primary corporate colours, including tint values from 100% to 10%.

COLOUR

Primary colour specifications

Magenta

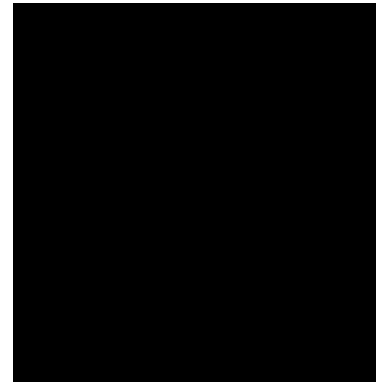

Pantone: 227c
CMYK: C26 M100 Y21 K12
RGB: R174 G16 B101
Hex: #AE1065

Yellow

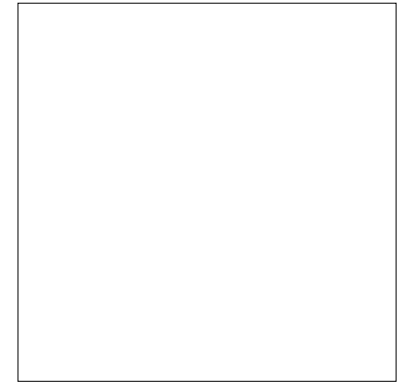

Pantone: 116c
CMYK: C0 M20 Y96 K0
RGB: R255 G204 B0
Hex: #FFCC00

Black

Pantone: Blackc
CMYK: C0 M0 Y0 K100
RGB: R0 G0 B0
Hex: #000000

White

Pantone: N/A
CMYK: C0 M0 Y0 K0
RGB: R255 G255 B255
Hex: #FFFFFF

Tints of Magenta, Yellow and black can also be used

Secondary colour specifications

One of the strengths of the Doherty Associates brand is the distinct primary colour palette of magenta and yellow. These should always be the first choice and the secondary colour should only be used if necessary. However, there are times when a secondary colour is needed for contrast and highlight as per the examples below:

Plum

Pantone: 222
CMYK: C26 M100 Y21 K60
RGB: R103 G6 B57
Hex: #670639

Tints of Plum can also be used

Do's

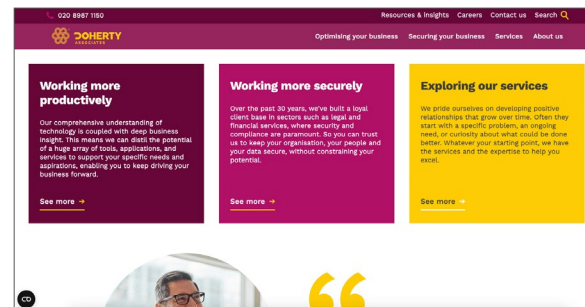

Table Heading	
1	
2	
3	
4	
5	

- Do use the secondary plum colour sparingly as an additional colour for feature boxes, graphs and tables or where contrast or a highlight is needed.
- Do ensure that the secondary colour doesn't dominate the primary colours. As a guide, the secondary colour should be no more than 25% of the colour on the page.

Don'ts

- Don't use the secondary colour for key brand elements - logo and icon. The logo should be in the primary colours only.

Logo colour combinations

In print, we can also use special finishes such as metallic foils and 'blind' embossing.

Note:
All directives also apply to the horizontal logo and the icon.

Logo colour - do's and don'ts

Do where possible use the colour combinations on page 29.

Do consider legibility and complimentary colouring when overlaying onto uncluttered photographic backgrounds.

If partnering with another brand try to keep it as neutral as possible and **do** use the white or black logo if overlaying onto partner brand colours.

Do use the white logo on uncluttered, contrasting, photographic backgrounds.

Do use the magenta logo on uncluttered, contrasting, neutral, photographic backgrounds.

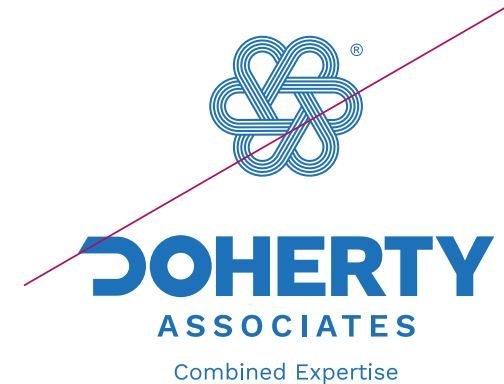

If partnering with another brand colour scheme **only** use the white and black logos.

Don't use the yellow on white as it is not legible.

Don't use white on yellow as it is not legible.

Don't use non-primary colours (see p27-29).

FONT

Our font

Work Sans

Our brand font for all digital and print communications is:

Work Sans

Weights available, including Italics:

Regular Medium

Semi Bold **Bold**

Extra Bold Black

The Work Sans font family is available to download from fonts.google.com

DdAa
123#

ABCDEFGHIJKLMN
OPQRSTUVWXYZ
abcdefghijklm
nopqrstuvwxyz
0123456789!@£\$%

Alternative font - only use in exceptional circumstances:

Arial

Weights available, including Italics:

Regular

Bold

If Work Sans is unavailable or if we cannot be sure of it presenting correctly on the end user's screen, please use Arial.

DdAa
123#

ABCDEFGHIJKLMN
OPQRSTUVWXYZ
abcdefghijklm
nopqrstuvwxyz
0123456789!@£\$%

Typography

Typography is a subtle, yet crucial element of the Doherty Associates visual identity.

Using our chosen typeface, **Work**, to the correct sizings and weights, ensures that our typography is consistent and legible across all our communication channels.

Type may be in black or white-out, or in our primary colours.

Tints are not favoured, although can be considered if there is a good case for it.

Headings

Headings and subheadings should be in **sentence case** or **CAPITALS** in the **Work Sans font**.

Headings can be centred or left-aligned. Always ensure there is sufficient space around a heading.

Body text

Body text can be light, regular or medium weights. Always in sentence case. Italic may be used for *highlighting* key information.

The minimum font size for body copy is 9pt on 11pt line spacing to ensure your text is legible. Predominantly left aligned.

Please be mindful of legibility and accessibility, and always consider who you are writing and designing for and whether it is wise to scale-up to 10 - 12pt to better meet the needs of a wider audience.

Layout and structure

Layouts should be clean and simple.

Do not clutter the layout with too many elements.

Do not use long, wide columns of text.

PHOTOGRAPHY

Photography guide

Photography is a powerful, visual element that adds real value when used appropriately to support engaging content. We can use it to communicate our brand personality and to quickly convey meaning in an interesting way.

Here are some pointers to selecting great imagery:

First consider the message you are trying to convey. Is the selected image adding to the communication?

Try to avoid over-used images and clichés. For example, people standing in front of 'success' charts or shouting angrily at their laptop screens.

Select high resolution jpg files for pictures.
Choose png files for graphics or diagrams.

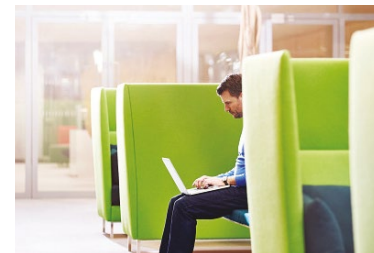

Use images that have been commissioned by Doherty Associates whenever possible.

If that's not possible, use paid-for stock library imagery.

Note: These photos are for reference only and should not be used or shared. Final photography TBC.

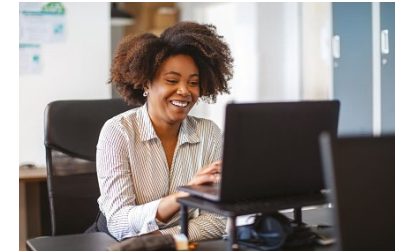

Aim to show **genuine communication** and **connection**.

Typically, aim for **natural** rather than staged images but don't ignore the value of an interesting setting.

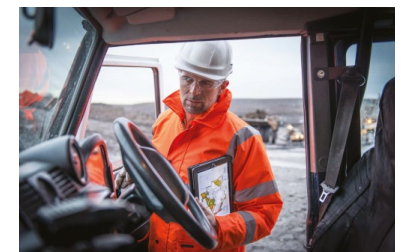

Look for **authentic** but **contemporary** workplace environments.

Show **relaxed moments** as well as full-on working.

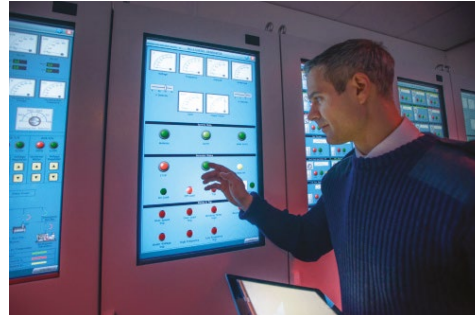

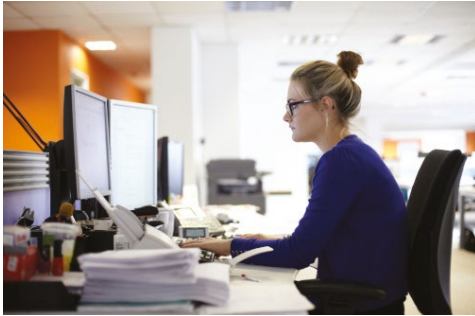

Choose photographs that reflect the **diversity** of the modern workplace. (young, old, black, white, male, female).

Remember **not every workplace is a conventional office**.

Photography examples

Approachable • Considered • Purposeful • Energised

Note: These photos are for reference only and should not be used or shared. Final photography TBC.

SUPPORTING GRAPHICS

The 60° angle

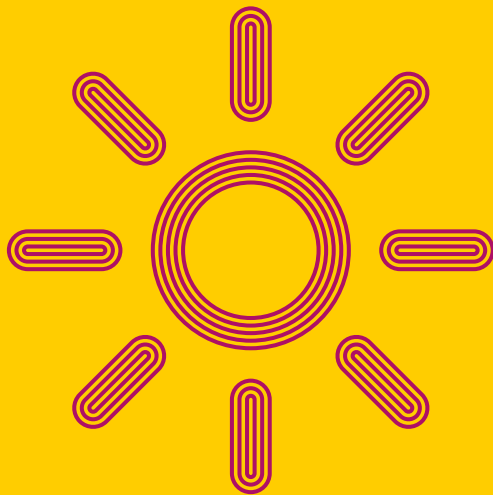

This simple graphic device echoes the 60° angle in the master icon. It can be angled from right-to-left or left-to-right.

It is a useful graphic both to add extra dynamism to a layout and to support messaging. It should be used sparingly.

Examples of large graphics

Graphics can be produced in the same style as the logo icon. They need to remain faithful to its style and match the stroke and spacing. In order to be successful they need to be used at a large size relative to the size of the media on which they appear.
